

Glazed Catalog

sebastián perez

El Sebastián Pérez **esmaltado** hecho a mano, con un gusto refinado y elegante, tiene la intención de ofrecer una nueva colección, donde los diferentes colores y las decoraciones están hechas a mano cuando el material todavía está en bruto, lo que da al producto terminado un sabor fresco y natural inconfundible.

Entre las técnicas utilizadas por nuestros maestros artesanos: cepilladas a mano, con el pincel, el esmalte se distribuye sobre el azulejo, las características son las estriaciones con matices de color siempre diferentes. Serigrafía a mano, a través de una tela de lona con la impresión del diseño que se realizará, el color está hecho para filtrar en la baldosa con una espátula. Impresión de la mano, el contorno del diseño se imprime en la baldosa mediante la distribución del color con un pincel, a través de una máscara que descansa sobre ella. Pero nada comparable a la decoración a mano libre, es la técnica más bella y preciosa.

Los maestros decoradores esbozan los contornos del diseño, los filetes, hechos con polvo de carbón, que desaparece durante la cocción.

CARACTERÍSTICAS DE MATERIAL

Las imperfecciones de luz del esmalte, las variaciones de color difusas y ligeras variaciones en el tono y el color son características de la artesanía original del producto, hecho, esmaltado y decorado completamente a mano.

El agrietamiento que aparece en la superficie acristalada es una característica de los vidriados particulares utilizados. Por lo tanto, tales imperfecciones no pueden dar lugar a disputas.

Mosaicos: la composición en la red hace que el formato sea susceptible a ligeras variaciones de tamaño. Fondos y placas: el procesamiento completamente manual hace que las dimensiones indicadas sean nominales, pequeñas variaciones en el tono y posibles microporosidades son características del producto.

Cada característica indicada no es obligatoria y constante y, por lo tanto, debe considerarse indicativa.

Debido al proceso de impresión, los colores en el catálogo pueden sufrir pequeñas variaciones y, por lo tanto, se consideran indicativos.

The Sebastian Perez handmade **glaze**, with a refined and elegant taste, intends to offer a new collection, where the different colors and decorations are made by hand when the material is still raw, which gives the finished product a fresh and unmistakable natural flavor.

Among the techniques used by our master craftsmen: brushed by hand, with the brush, the enamel is distributed over the tile, the characteristics are the striations with shades of color always different. Screen printing by hand, through a canvas fabric with the print of the design to be made, the color is made to filter on the tile with a spatula. Hand print, the outline of the design is printed on the tile by distributing the color with a brush, through a mask that rests on it. But nothing comparable to decoration by free hand is the most beautiful and precious technique.

The master decorators outline the contours of the design, the fillets, made with coal dust, which disappears during cooking.

MATERIAL CHARACTERISTICS

Enamel light imperfections, diffuse color variations and slight variations in tone and color are characteristics of the product's original craftsmanship, made, enameled and decorated entirely by hand.

The cracking that appears on the glazed surface is a characteristic of the particular glazes used. Therefore, such imperfections cannot give rise to disputes.

Mosaics: the composition of the network makes the format susceptible to slight variations in size. Funds and plates: the completely manual processing make the indicated dimensions are nominal, small variations in the tone and possible micro-porosities are characteristic of the product.

Each indicated characteristic is not obligatory and constant and, therefore, should be considered indicative.

Due to the printing process, the colors in the catalog may suffer small variations and, therefore, are considered indicative.

Sebastian Perez émaillée à la main, avec un goût raffiné et élégant, il a l'intention de proposer une nouvelle collection, où les couleurs et les décos sont faites à la main lorsque le matériau est encore brut, ce qui donne au produit fini une saveur naturelle fraîche et incomparable.

Parmi les techniques utilisées par nos maîtres artisans: brossées à la main, au pinceau, l'email est réparti sur la dalle, les caractéristiques sont les stries avec des nuances de couleurs toujours différentes. Sérigraphie à la main, à travers un tissu de toile avec l'impression de la conception à faire, la couleur est faite pour filtrer sur la tuile avec une spatule. Impression à la main, le contour de la conception est imprimé sur la mosaïque en distribuant la couleur avec un pinceau, à travers un masque qui repose dessus. Mais rien de comparable à la décoration à la main libre, c'est la technique la plus belle et la plus précieuse.

Les maîtres décorateurs dessinent les contours de la conception, les filets, faits de poussière de charbon, qui disparaît lors de la cuisson.

CARACTÉRISTIQUES MATERIELLES

Les imperfections de la lumière émail, les variations de couleur diffuse et les légères variations de tons et de couleurs sont des caractéristiques de l'artisanat original du produit, fabriqué, émaillé et décoré entièrement à la main.

La fissuration qui apparaît sur la surface vitrée est une caractéristique des émaux particuliers utilisés. Par conséquent, de telles imperfections ne peuvent donner lieu à des différends.

Mosaïques: la composition dans le réseau rend le format susceptible de légères variations de taille. Fonds et plateaux: le traitement entièrement manuel permet d'obtenir des dimensions nominales, de petites variations de ton et des micro-porosités éventuelles sont caractéristiques du produit.

Chaque caractéristique indiquée n'est pas obligatoire et constante et, par conséquent, devrait être considérée comme indicative.

En raison du processus d'impression, les couleurs du catalogue peuvent subir de petites variations et, par conséquent, sont considérées comme indicatives.
